More specifically, the present invention relates to a method and apparatus for mixing materials in small volumes on site. There are many applications where it is necessary to mix and dispense a homogeneous mixture of materials. One example is the mixing and dispensing of chemicals and pharmaceuticals for the production of drugs, pesticides, catalysts, or the like. Such mixing and dispensing is typically done in large volume mixing and dispensing apparatus known in the art. Typically, these devices mix and dispense in batches that are typically 2 to 20 kilograms in size. The batch size is typically a function of the size of the dispensing apparatus used to 570a42141b
